

REMARKS

Claims 1-12 are pending in the application and have been allowed.

This response addresses objections to the specification raised by the examiner. In particular, applicants have amended the specification as follows, at the request of the examiner:

at page 18, line 9 – the term "etc" has been replaced with "and the like";

at page 21, line 9 – the spelling of anthranilates has been corrected;

at page 21, line 29 – the term "ethylhexyl 2" has been corrected to "ethylhexyl-2";

at pages 19, 36, 37, and 56, the recitations of genus and species have been corrected by proper capitalization and italicizing.

In view of the corrections to the specification, it is submitted that the objections to the specification have been overcome and should be withdrawn.

It is submitted that the application is now in a form for allowance. An early and favorable action on the merits is respectfully requested.

Should the examiner wish to discuss the foregoing, or any matter of form in an effort to advance this application toward allowance, the examiner is urged to telephone the undersigned at the indicated number.

Dated: March 7, 2008

Respectfully submitted,

By 
James J. Napoli
